

PARACHUTE CORD

National Braiding is a key producer of parachute cord, otherwise known as paracord. Parachute cord is a lightweight braid primarily used in the suspension lines of parachutes. Over the years, the product end use has evolved to include other uses where strength and abrasion is a crucial factor. The NBI paracord is manufactured to strict specification parameters and the final product is tested throughout the manufacturing process to ensure conformity to the original specification.

ACCREDITATION

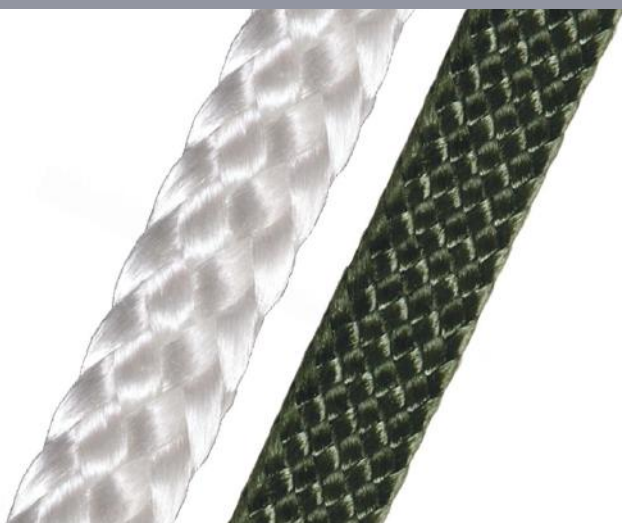

NBI products are manufactured in accordance with the ISO 9001:2015 quality management system.

The in-house laboratory, where continuous product testing during the manufacturing process is done, allows for consistent quality and specification adherence.

CONSTRUCTION

- Yarns used in the manufacture of paracords are of superior quality, thus producing a product of excellent performance abilities.
- The parachute cord is packed in continuous lengths, join free.
