

GARAGE DOOR BRAID

Garage door braid is a niche product line manufactured by National Braiding specifically for roll up garage doors. The braided running strips are made from high tenacity nylon yarn, braided around a PVC core. This unique structure of the running strip ensures that the garage door rolls up and down effortlessly. The door braid is attached to the door steel and thus acts as a buffer for the steel and provides a smooth, quiet operation to the roll up door mechanism.

ACCREDITATION

NBI products are manufactured in accordance with the ISO 9001:2015 quality management system.

The in-house laboratory, where continuous product testing during the manufacturing process is done, allows for consistent quality and specification adherence.

CONSTRUCTION

- The nylon yarn used in the manufacture of door-braid, is of superior quality, thus producing product of excellent performance abilities.
- NBI garage door braid is standard wound onto reels with cardboard flanges to facilitate manual handling.

KEY FEATURES & BENEFITS

- BUFFER FOR THE ROLLUP STEEL
- PROVIDES A SMOOTH QUIET OPERATION
- ROLLS UP AND DOWN EFFORTLESSLY

INDUSTRY APPLICATIONS

GARAGE DOOR BRAID IS MADE SPECIFICALLY FOR THE EASE OF OPERATION IN ROLL-UP GARAGE DOORS.
